

Monitor, analyse and act in the least possible time

Multi sensor data logger

Live on-line photo and data analysis web portal and app

CONTINUOUS SIMULTANEOUS CAPTURING AND DATA LOGGING OF

Environment

- 170 degrees images
- Air pressure
- Temperature
- Humidity
- Luminosity

Objects

- Image movement
- IR object movement
- PM 2.5 particles
- PM 10 particles

Gasses

- CO2 concentration
- NH3 concentration
- Extra on demand

For use inside farms, greenhouses, and indoor locations that have to be continuously monitored. Can be connected through Ethernet/WiFi, 4G sim card, or as stand alone data logger model.

When connected to the internet, data is directly available on the web portal for analysis. Thresholds can be set per data stream, for fast exceedance detection and image analysis.
